

Note: Please cite any resources used, and mention any classmates that you worked with on this assignment. If you worked alone, please also say so. We will start taking points off if this is missing.

Problem 1. Web Security

In your own words, give one real world example for each of the following Web Security Threats:

- (a) Compromise of underlying system
- (b) Gateway to enabling attacks on clients
- (c) Disclosure of sensitive or private information
- (d) Impersonation (of servers, or vice versa)
- (e) Defacement
